Any references to past investment performance are not an indication of future investment returns.

Commentary

Equity markets rallied in February, with markets increasingly optimistic of rate cuts by Central Banks. The Australian equity market rose 0.8%, underperforming international equity markets on both a hedged (4.7%) and unhedged basis (5.9%). The Information Technology sector led gains domestically but were offset by declines in the Energy and Materials sectors as commodity prices fell. Emerging markets rose 6.4%, outperforming both Australian and internal equity markets. Emerging markets performance was driven by Chinese markets (10.0%) on government stimulus including cuts to a key mortgage policy rate.

The Apt Growth SMA returned 3.0% this month. The best performer in the portfolio was Goodman Group, rallying 16.8% on its half year results which included a 29% increase in operating profit on the prior corresponding period. Wesfarmers Limited was the next best performer, rising 16.1% after its half year results with Wesfarmers' businesses remaining resilient despite the tough economic environment. Xero Limited benefitted from the rally in technology shares and the release of their FY25-27 strategy, outlining their goals and plans for future growth. Other strong performers included the Nanuk New World Fund (8.2%), the Ironbark Royal London Concentrated Global Shares Fund (7.6%), Ramsay Health Care Limited (7.2%), Coles Group Limited (6.2%) and the T.Rowe Price Global Equity (Hedged) Fund (6.2%).

The main detractor in the portfolio for January was ResMed Inc which slipped -8.5%. Despite increasing first half year revenue by 14%, ResMed Inc saw increased selling, general and administration expenses, and a 0.5% fall in gross margin due to a safety notification for masks sold with magnets and an unfavourable product mix.
